Supply Chain Turnaround for PE-Backed Wireless Retailer (Post-Bankruptcy NewCo)

Rebuilt the supply chain of a PE-owned wireless retailer emerging from bankruptcy to support national retail at lower cost.

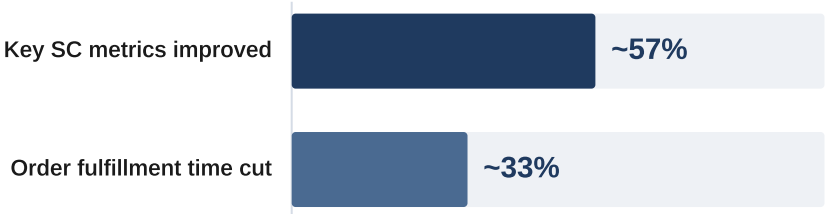

CONTEXT / CHALLENGE

A PE-owned wireless retailer emerging from bankruptcy needed a rebuilt supply chain that could support national retail without the cost and service failures of the prior model. Complexity across Asian vendors, inventory, and store fulfillment threatened in-stock levels and working capital.

APPROACH

- 1 Led a ~150-person supply chain organization managing ~\$30M cost and \$500M+ procurement.
- 2 Analyzed end-to-end SC performance and outsourced select SC functions.
- 3 Redesigned store UoM / WMS–JDE pack-ship logic for multi-level MoQ.
- 4 Renegotiated terms with ~74 Asian vendors.

REPORTED IMPROVEMENT (%)

Bars drawn to scale; grey track marks the full percentage scale. Percentages as reported in source (approximate).

OUTCOMES

- Reduced annual SC costs ~\$5M.
- Improved key SC metrics (forecast accuracy, in-stock %, inventory turns, delivery) ~57%.
- Cut order fulfillment time ~33%.
- Designed for 95%+ in-stock at store level.

PROJECT

02

INDUSTRY

Telecom / wireless carrier

DURATION

2011–2013

ROLE

Designed and led the 4PL program

ENGAGEMENT TYPE

Supply Chain Outsourcing / 4PL / S&OP

First Fully Outsourced Carrier Logistics (4PL) for Regional Prepaid Wireless Carrier

Designed and led a regional prepaid carrier's first fully outsourced logistics / 4PL program, alongside S&OP and an employee idea-driven cost program.

KEY RESULTS

~\$100M

capital-spending benefit

>99%

warehouse-to-store order accuracy

>75%

forecast accuracy

CONTEXT / CHALLENGE

A regional prepaid wireless carrier's logistics and supply chain could not scale economically; warehouse-to-store accuracy and forecast quality limited growth and capital efficiency.

APPROACH

- 1 Designed and led the carrier's first fully outsourced logistics / 4PL program.
- 2 Cleaned store-level SKU and MoQ master data for 3PL handoff.
- 3 Installed carrier S&OP rhythm (product, 4P, consensus demand).
- 4 Installed an employee idea-driven cost program with board visibility.

ACCURACY LEVELS REACHED (%)

Bars drawn to scale; grey track marks the full percentage scale. Levels as reported in source.

OUTCOMES

- Delivered ~\$100M capital-spending benefit from the outsourced logistics model.
- Improved warehouse-to-store order accuracy to >99%.
- Raised forecast accuracy to >75%.

Global NetSuite, HubSpot, and Kyriba Implementation for PE Exit Readiness (Multi-Entity Adtech)

Established NetSuite and HubSpot as the global system of record for a PE-backed adtech platform preparing for exit.

KEY RESULTS

~50%

less banking reconciliation effort

~\$40M

business with real-time forecast & KPI visibility

~90-day

RTB / CPFR install ahead of ERP

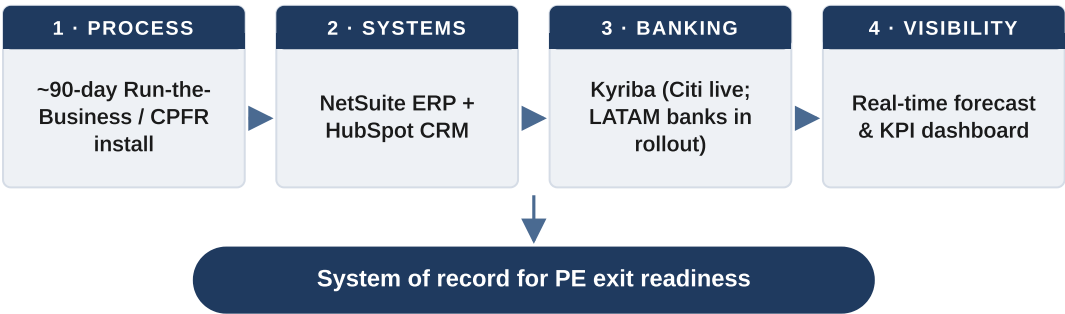

CONTEXT / CHALLENGE

A PE-backed multi-entity digital advertising platform lacked a single system of record for finance and go-to-market data, slowing PE exit readiness and creating heavy bank reconciliation and forecast blind spots across US and LATAM entities.

APPROACH

- 1 Preceded ERP with a ~90-day Run-the-Business / CPFR process install.
- 2 Implemented NetSuite ERP and HubSpot CRM as global systems of record with NetSuite, LatamReady, and Deloitte Tax partners.
- 3 Integrated banking partners through Kyriba (Citi live; LATAM banks in rollout).
- 4 Built a real-time forecast and KPI dashboard for the ~\$40M business.

IMPLEMENTATION SEQUENCE

Steps and figures as stated in source.

OUTCOMES

- Established NetSuite and HubSpot as the system of record for PE exit readiness.
- Cut banking reconciliation effort ~50% via Kyriba.
- Gave leadership real-time forecast and KPI visibility across the ~\$40M portfolio.

PROJECT

INDUSTRY

Technology / consumer electronics

DURATION

2009–2011

ROLE

Led ~100-person team

ENGAGEMENT TYPE

Operations Leadership / Retail Supply Chain

North America Operations and Retail Supply Chain for Global PC OEM

Led operations, pricing, forecasting and retail supply chain for a global PC OEM's ~\$10B North America online and retail business.

KEY RESULTS

~\$200M

wireless carrier contract revenue

~5%

profit increase, ~\$2B retail market

~\$3M

annual SC staff cost cut

~100

person team led

CONTEXT / CHALLENGE

A global PC OEM's North America online and retail business (~\$10B) needed tighter operations, pricing and forecasting, and retail supply chain performance while reducing SC overhead and capturing wireless carrier revenue.

APPROACH

- 1 Led a ~100-person team across pricing, forecasting, demand planning, PLM, and retail ops for the ~\$10B NA online and retail operation.
- 2 Drove wireless carrier contract pursuits in the US and Europe.
- 3 Drove profit actions in the ~\$2B consumer retail segment.

SCOPE OF RESPONSIBILITY (\$B)

Bars drawn to scale; business scope as stated in source (approximate).

OUTCOMES

- Closed ~\$200M wireless carrier contract revenue (US and Europe).
- Increased profits ~5% in the ~\$2B consumer retail market.
- Cut SC staff cost ~\$3M annually.

DURATION

2001–2008

ROLE

Master Black Belt (Six
Sigma)

ENGAGEMENT TYPE

Process Excellence /
Governance / S&OP

Six Sigma and Sales Governance / S&OP for Global Handset OEM

Led Six Sigma, governance and S&OP for a global handset OEM's multi-regional sales organization.

KEY RESULTS

~\$20M

annual cost reductions via Six Sigma

~27%

Europe & US sales workforce reduction

~\$18B

sales organization governed (~\$1B profit)

CONTEXT / CHALLENGE

A global handset OEM's multi-regional sales organization (~\$18B sales / ~\$1B profit) needed stronger forecast governance and lower cost-to-serve across international sales and marketing.

APPROACH

- 1 Led Six Sigma as Master Black Belt across international sales and marketing.
- 2 Built governance and S&OP so multi-regional sales could hit forecasts.
- 3 Ran a value-of-efforts program to eliminate low-value work from the Europe and US sales workforce.

ORGANIZATION GOVERNED (\$B)

Bars drawn to scale; organization scale as stated in source (approximate).

OUTCOMES

- Delivered ~\$20M annual cost reductions via Six Sigma.
- Installed governance supporting forecast attainment for the ~\$18B sales / ~\$1B profit organization.
- Reduced Europe and US sales workforce ~27% via value-of-efforts.

ROLE

Built and managed
US&C sales ops

ENGAGEMENT TYPE

Commercial Ops /
Post-Acquisition Ops

US & Canada Sales and Product Operations Build for SoftBank-Owned Wireless Distributor

Built the US & Canada sales and product operations backbone for a SoftBank-owned global wireless distributor.

KEY RESULTS

~40%

customer satisfaction improvement

~85%

employee satisfaction

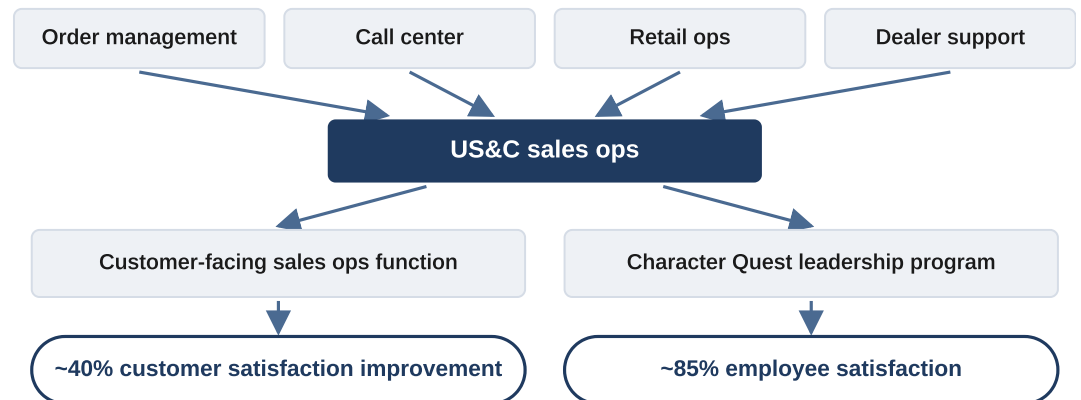

CONTEXT / CHALLENGE

A SoftBank-owned global wireless distributor needed a stronger US and Canada sales and product operations backbone spanning order management, call center, retail ops, and dealer support amid multibillion-dollar scale and post-acquisition commercial pressure.

APPROACH

- 1 Built and managed sales ops for the US&C business across OM, call center, retail ops, and dealer support.
- 2 Stood up a customer-facing sales ops function.
- 3 Stood up the Character Quest leadership program.

OPERATING MODEL AND RESULTS

Steps and figures as stated in source.

OUTCOMES

- Improved customer satisfaction ~40% via the customer-facing sales ops function.
- Reached ~85% employee satisfaction through Character Quest.

Supply Chain Center of Excellence and Analytics Value for National Big-Box Retailer

Built an enterprise Supply Chain Center of Excellence for a national big-box home-improvement retailer.

KEY RESULTS

~\$10M

enterprise value added

CoE

Supply Chain Center of Excellence built

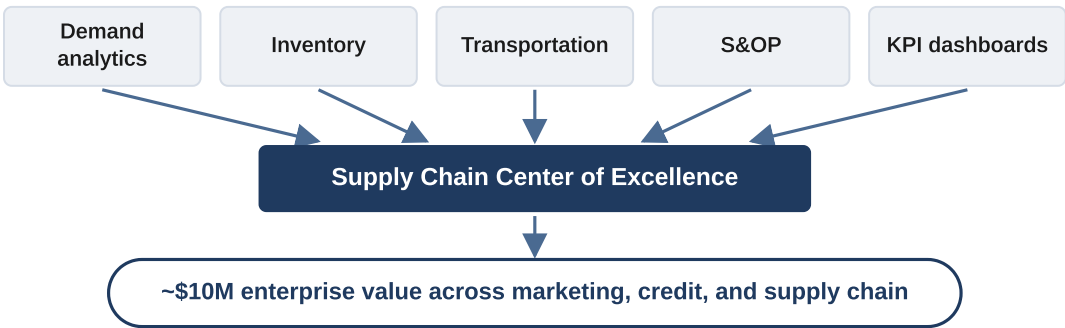

CONTEXT / CHALLENGE

A national big-box home-improvement retailer needed an enterprise supply chain analytics capability spanning demand, inventory, transportation, S&OP, and KPIs — plus measurable value across marketing, credit, and supply chain.

APPROACH

- 1 Served as Supply Chain Practice Leader at a decision-science firm on the retailer engagement.
- 2 Built a Supply Chain Center of Excellence covering demand analytics, inventory, transportation, and S&OP.
- 3 Added KPI dashboards to the Center of Excellence.

CENTER OF EXCELLENCE BUILD

Steps and figures as stated in source.

OUTCOMES

- Added ~\$10M enterprise value across marketing, credit, and supply chain.

Excess Inventory Disposition for PE-Backed Automotive Aftermarket Manufacturer

Structured and executed disposition of ~\$2.4M excess inventory for a PE-backed automotive aftermarket manufacturer.

KEY RESULTS

~\$2.4M

excess RM/WIP dispositioned

OEM + Auction

disposition channel paths

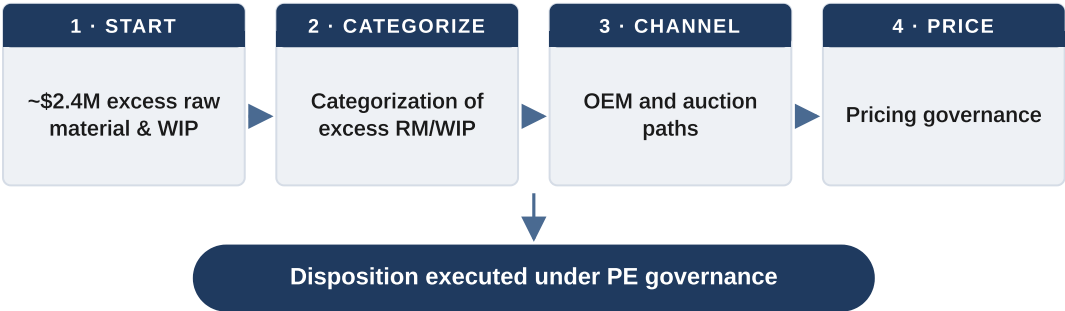

CONTEXT / CHALLENGE

A PE-backed automotive aftermarket manufacturer carried ~\$2.4M excess raw material and WIP that needed disciplined disposition without destroying value or channel pricing.

APPROACH

- 1 Led categorization of excess RM/WIP.
- 2 Led channel strategy across OEM and auction paths.
- 3 Led pricing governance for disposition.

DISPOSITION APPROACH

Steps and figures as stated in source.

OUTCOMES

- Structured and executed disposition of ~\$2.4M excess inventory under PE governance.
